

NO. 11839 41ST YEAR

COLORADO SPRINGS, COLO., TUESDAY, FEBRUARY 11, 1913

PRICE FIVE CENTS

SCOTT AND 116 KILLED, 40 COMPANIONS PERISHED INJURED IN CLASH

Word Brought From South
Polar Regions of Horrible
Fate of Explorers

STARVATION LATEST BELIEF BATTLE LASTS MANY HOURS

Whole World Mourns Loss of
Daring Men Who Gave
Lives for Science

LONDON, Feb. 10.—Only meager details are available as yet of the polar tragedy which cost the lives of Capt. Robert F. Scott and four of his brave companions, and which ranks in disastrous results with the ill-fated Franklin expedition. News of the death of Captain Scott and his men, who succeeded by a final dash in reaching the South pole, only to find proofs that Roald Amundsen and his party, who came in a brief scratch from Lieut. E. R. G. R.

CAPT. ROBERT F. SCOTT,
Intrepid Antarctic Explorer, Who Lost
His Life in the South Polar Regions.

Commander of the Royal Navy, who was second-in-command when the expedition started, and who now signs as "commander."

The message was signaled from the steamer Terra Nova, returning from the Antarctic regions, while passing Oamaru, New Zealand.

The staggering effects of the news on the public mind is all the greater as it was believed that modern science and recent experience had completely discredited polar exploration of its former terrors.

Discourages Further Attempts.
No great surprise would have been felt had Captain Scott failed to reach the pole, but that he should perish in his hour of triumph was the very last thing that could be anticipated, and in view of the terrible dangers, which still exist, the fate of Captain Scott and his companions is likely to discourage further attempts to reach the poles, now that both have been attained and the circumstances of hurried dashes prevent valuable scientific results from being obtained.

No detailed facts are yet known, but it is believed the records of the scientific material collected, together with the explorers' bodies, have been recovered.

It is also understood that gallant attempts were made by other members of the expedition to succor the Scott party, but these were defeated by severe weather conditions and lack of food. It seems practically certain that the explorers starved to death.

Met With Misfortune.
Dr. Ehrlich Marshall, who was surgeon to the Shackleton expedition, suggests that the Scott party may have been overtaken by a severe blizzard, which would have rendered the expedition helpless.

The fact that Captain Amundsen reached his base from the pole in 33 days, while the Scott party had been traveling more than two months when disaster overtook them, is believed to show that Scott must either have met some misfortune, possibly in a ravine, or encountered a succession of blizzards. The fact that a Petty Officer Evans died from concussion of the brain as early as February 17, seems to indicate some such accident, possibly involving the loss of a portion of the equipment.

Captain Gates died March 17, which clearly shows that the party was in dire straits, and must have undergone terrible sufferings during the remaining 12 days.

Bodies Found Nov. 12.
Further information reaching the Royal Geographical Society says that the rescue party which Captain Evans led in October reached One Ton depot

Five Companies State Militia
Rushed to West Virginia
Coal Fields

BATTLE LASTS MANY HOURS

Strikers and Authorities in
Desperate Struggle—Climax to Long Siege

CHARLESTON, W. Va., Feb. 10.—Sixteen are dead, including 12 miners and four mine guards, as the result of a desperate battle in the Kanawha county coal fields today. The miners' leaders admit a dozen strikers were killed. At midnight, when quiet was restored, it was said upwards of 40 persons had been injured.

Five companies of state militia reached the troubled zone tonight. All trains of the Chesapeake & Ohio into the strike territory tonight are equipped with machine guns. The guns are screwed to the rear platform of a coach as a precaution against night attacks. It is maintained at all times and ready for instant use.

Strikers, however, marching toward Mucklow, where they met in the mountains by a posse under Fred Lester, a former captain of the West Virginia National guard, now in the employ of a coal company. A sharp engagement followed. A bookkeeper and two mine guards were shot dead and several others wounded. Lester and his men were slowly driven back, contesting every foot of the ground.

Reinforcements of guards from other mining companies, railroad police and deputy sheriffs joined Lester's men, but they could not check the advance of the miners, who steadily advanced, pouring a hot fire into the ranks of the guards.

The fighting continued throughout the afternoon. The last telegraph wire into Mucklow was cut yesterday, and it was difficult to communicate with the strike district.

Shortly after 5 o'clock reports of the fighting filtered into Charleston from persons who had ridden on horseback to points within 15 miles of this city. From these reports it was believed at least a score of lives had been lost in the fighting, and prompt measures were taken to get militia in the field.

Companies M and C of Charleston, and C. H. and I of Huntington, which have been held in readiness for several days, were started for the strike district within a short time. The Charleston companies were sent 22 miles through an isolated mountain territory and through the heart of the mine strike zone before reaching Mucklow, while the companies from Huntington are 75 miles away.

Trouble Began Last April.
The coal strike in the Paint and Cabin creek districts of Kanawha county had its inception last April. It soon became necessary to send troops into the district to quell rioting, and Governor Glasscock issued a proclamation of martial law, the first ever declared in West Virginia. After a time conditions became normal and the troops were withdrawn. After a few weeks' interval rioting again broke out. Trains were held up, coal tips burned and persons shot and beaten. Governor Glasscock declared

FRIEDMANN REFUSES TO SELL CURE; U. S. TAKING INTEREST IN GREAT DISCOVERY

Says It Has Been Applied to Over 21,000
Persons; First Tried It on Himself

BERLIN, Feb. 10.—There is no foundation for the report published in America that the Berlin Medical society has denounced Dr. Friedrich Friedmann's remedy for tuberculosis. Dr. Friedmann, a government physician, has refused a government offer to try out his remedy for tuberculosis at the government institute of experimental therapeutics at Frankfurt-on-the-Main, under the supervision of Dr. Paul Ehrlich, according to a statement by the department of the interior.

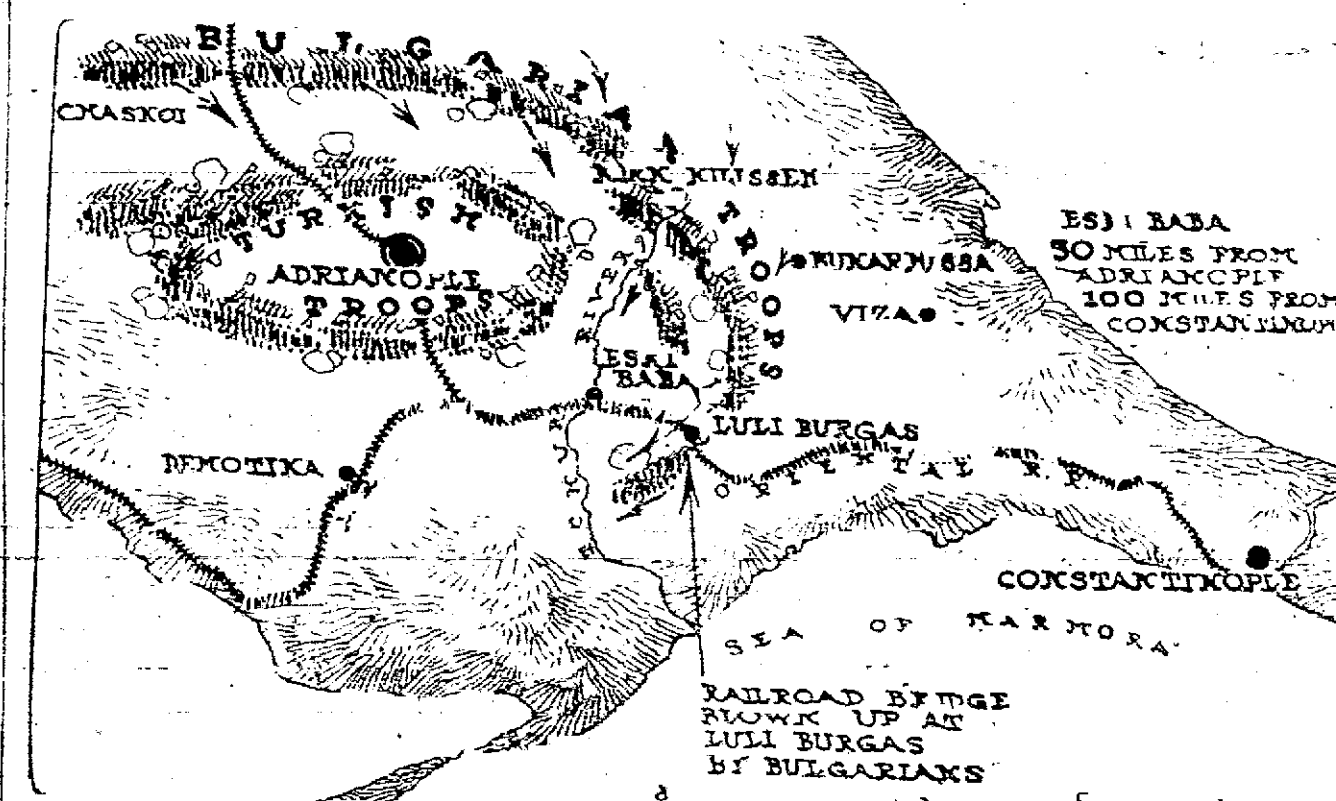

Dr. Friedmann insists that he himself must apply the remedy in hospitals designated by the government. The government has rejected a tentative offer to buy the remedy.

U. S. Taking Interest.

WASHINGTON, Feb. 10.—Translations of Dr. Friedrich Friedmann's statements regarding his new system of treating tuberculosis, furnished to congress through Consul General Thackeray at Berlin, have been completed by the state department and the complete data procured at the request of congress soon will be printed.

Dr. Friedmann's address did not give the secret of his new remedy, which is understood to be a serum derived from cold blooded animals. According to the official reports, he will not make this known until he is pre-

POSITIONS OF ALLIES AND DEFENDERS AROUND ADRIANOPLE
The above map gives an accurate idea of the position of the opposing forces in the fight that is being made by the allies to wrest from the Turks the most coveted position in the bloody Balkan war. The map illustrates the manner in which the troops of the allies have cut off communications between Constantinople and the besieged defenders of Adrianople.

COURT RULING MAKES COLORADO CITY 'DRY'

Higher Tribunal Affirms Decision of District Judge Sheafor in 1911

The state court of appeals, by a decision handed down yesterday morning, has declared that at the election of April 4, 1911, Colorado city was voted dry by three votes, instead of by one, as the returning showed. This affirms a decision by Judge J. W. Sheafor in the local district court in October, 1911. The attorneys for Colorado city, Samuel H. Kinsey and F. F. Schreiber, now have 15 days in which to file a motion for a rehearing, and the attorneys for the "drys," J. P. Jackson of Colorado city and Wayne C. Williams of Denver, 10 days after that time in which to file an answer. In case the motion for a rehearing is denied, the court of appeals will formally declare the town "dry."

The returns of the local election in Colorado city, April 4, 1911, showed that the city had remained "wet" by one vote, but April 18 the "dry" faction filed a contest suit in the local district court. This came up for a hearing on its merits before Judge Sheafor in October, 1911, and in a trial of 11 days various ballot boxes were opened. Judge Sheafor decided that certain of the votes cast had been illegal, and ruled that the result of the election had been that the town had "gone dry" by a majority of three votes. The case was taken to the supreme court of the state on a writ of error and a supersedeas was issued. The supreme court turned the case over to the court of appeals last August.

When the case was first begun, L. W. Cunningham assisted the attorneys for the dry side in their work. Judge Cunningham is now a member of the court of appeals, but did not sit in the hearing of the case and had no part in the decision. J. P. Jackson was assisted by Assistant District Attorney Burns when the case was tried locally. If the city is formally declared dry, the saloons will have to close down soon afterward, but it is probable that the question will be again brought up at the spring election. Those on the "wet" side point out that Colorado city remained "wet" when the question of statewide prohibition was voted on last fall, and believe that the vote of two years ago will be reversed if a vote is taken this spring.

Old Charges, He Says.
"That it relates to transactions most of which occurred years ago, and to engineering works which were done over by the board of army engineers that investigated all of the reclamation projects in 1910; that Adams and Newell have been criticised without proof and without hearing; and, that many of the charges made can have no credible evidence whatever to support them."

"First Assistant Secretary Adams is held responsible for three rulings, two of which were made in the administration of Secretary Garfield, and the third was approved by me after a personal visit to Phoenix, last October, when I went over the whole matter at a public meeting of the Water Users association, which adopted a resolution recommending the course which I sanctioned and of which I have since received no complaint."

Invites Investigation.
"I believe it is a good thing to have a periodical investigation of the operations of the reclamation service, but it should be carried out by a commission competent to judge of those operations and which will hear the officials before it condemns them."

Assistant Secretary Adams declared in a statement that if congress deemed it wise to expend \$25,000 for another investigation of the reclamation service, it would be welcome.

"I shall do everything possible to see that it shall be thorough," he added, "and that it shall be completed and not abandoned until the responsibility for each of the charges named is placed where it belongs. The department requested the committee for a copy of the report as it was given to the press, but was refused. I have no copy of the report, which has appeared without any signature to show its authorship."

KING PLACED ON TRIAL FOR SHOOTING JACKSON

George King was placed on trial before Judge J. W. Sheafor in the district court at Kiowa last night at 7:30 o'clock on the charge of murdering Peter (Felix) Jackson in Elbert county two years ago. This is the second time he has been on trial in the Elbert county district court, the supreme court recently granting him a new trial after he had been sentenced to death. When the jury was impaneled at 9:30 o'clock, District Attorney Purcell said that the trial probably would last through the night. He said that he would ask for life imprisonment.

FISHER DEFENDS HIS ASSISTANTS

SAYS CHARGES BASED ON OLD REPORT
Reclamation Service, He Says, Invites Investigation by Congress

WASHINGTON, Feb. 10.—Secretary of the Interior, Fisher issued today a statement in defense of officials of the reclamation service against whom charges of incompetence and maladministration have been made by the house subcommittee on interior department expenditures. The committee requested that congressional inquiry be made into the charges, and recommended the removal from office of Assistant Secretary of the Interior Samuel Adams and F. H. Newell and L. C. Hill, director and supervising engineer, respectively, of the reclamation service during the pendency of such an inquiry.

"I would have no comment whatever to make about this subcommittee report," said Secretary Fisher, "were it not that I think the higher-minded public officials whom it criticizes are entitled to have me say: 'Old Charges, He Says.'"

"That it relates to transactions most of which occurred years ago, and to engineering works which were done over by the board of army engineers that investigated all of the reclamation projects in 1910; that Adams and Newell have been criticised without proof and without hearing; and, that many of the charges made can have no credible evidence whatever to support them."

"First Assistant Secretary Adams is held responsible for three rulings, two of which were made in the administration of Secretary Garfield, and the third was approved by me after a personal visit to Phoenix, last October, when I went over the whole matter at a public meeting of the Water Users association, which adopted a resolution recommending the course which I sanctioned and of which I have since received no complaint."

Invites Investigation.
"I believe it is a good thing to have a periodical investigation of the operations of the reclamation service, but it should be carried out by a commission competent to judge of those operations and which will hear the officials before it condemns them."

Assistant Secretary Adams declared in a statement that if congress deemed it wise to expend \$25,000 for another investigation of the reclamation service, it would be welcome.

6,500 ARE KILLED IN BATTLE AT SCUTARI

Heavy Fighting Takes Place Between Montenegrins and Turks

LONDON, Feb. 10.—Severe fighting has occurred in the event of the Montenegrins to capture Scutari. The Montenegrins are reported to have taken Bardani Joli hill, one of the strategic positions, but at a cost of 2,500 men killed and wounded. The same dispatches place the Turkish loss at 4,000 men. Thousands of fresh troops have been arriving at Constantinople from Anatolia, and in the last few days several troop ships have departed, but their destination has not been divulged. There are signs that the port is preparing the way to leave the fate of Turkey in the hands of Europe to obtain the best possible settlement.

MINING CORPORATION SHARES READY SOON

El Paso Co. Officers Advise Exchange of Stock Certificates

The annual meeting of the El Paso Consolidated Gold Mining company, for the election of officers and directors and the discussion of a number of matters, chief in importance being the consolidation scheme with the Golden Cycle company, which company not only owns the mine, but also the mill that at present does the milling of 80 per cent of the ore production of the mine in the Cripple Creek district, thereby having the advantage of a large and very profitable commercial business, and

Whereas, The El Paso has for years paid liberal tribute to the Golden Cycle Mining company for milling its ore production, and there is now a five-year mining contract under which these two companies are operating, and the interests of the El Paso stockholders would be conserved and materially benefited by the acquisition of control of the Golden Cycle Mining company, which company not only owns the mine, but also the mill that at present does the milling of 80 per cent of the ore production of the mine in the Cripple Creek district, thereby having the advantage of a large and very profitable commercial business, and

Whereas, An opinion has been obtained which will result greatly to the benefit of the El Paso stockholders, in practically all of the outstanding stock of said the Golden Cycle Mining company, which company is earning over \$1,000,000 net per annum on its capitalization of \$1,500,000; and

Whereas, To the end that these two companies and other high-class mining companies of the Colorado Cripple Creek district shall be consolidated and their interests merged, there has been formed, under the laws of Delaware, a corporation named "The Colorado Mines, Railways and Utilities Corporation," with an authorized capital of \$25,000,000, consisting of 5,000,000 shares of one class of stock of a par value of \$5 per share, of which approximately \$10,000,000 will be issued in the near future, leaving \$15,000,000 in the treasury of the company to be issued at later periods, when and as other properties shall be acquired; and

Whereas, The stockholders of this company are offered the privilege of receiving six shares of the stock of said utilities company in exchange for five shares of the present El Paso stock; be it

Resolved, That we strongly recommend to the stockholders of this company the acceptance of the proposition contained in this resolution and the deposit of their stock in exchange for the stock of said The Colorado Mines, Railways and Utilities Corporation, when the same shall be requested by said company; and

Resolved, Further, that the bankers for this company, Joseph Walker & Sons, 20 Broad street, New York city, be requested to address a letter to the stockholders of the company, explaining the financial status of the separate and consolidated companies, also setting forth the mode of procedure for the exchange of the stock of this company and the Golden Cycle Mining company for the stock of said Colorado Mines, Railways and Utilities Corporation.

WILL PREVENT SHIPMENT OF LIQUOR INTO DRY STATES.

Now Up to Taft

WASHINGTON, Feb. 10.—The senate passed tonight the Webb liquor bill already passed by the house as a substitute for the Kenyon-Sheppard bill. The Webb bill would prohibit shipments of intoxicating liquors from one state to another when intended for the use of the states to which the shipment is made. Friends of the legislation need will seek to have the house concur in the senate bill, should that be done, the bill passed by the senate will go to the president for his signature. The substitution of the Webb bill for the Kenyon-Sheppard bill came at the close of prolonged debate, and was

STREET RIOTS MEXICO CITY OCCUR IN TOKIO

Mobs Attack Authorities and Newspapers—Great Excitement Prevails

ASK RESIGNATION CABINET

Premier Katsura Stoned by Irate Citizens—Result of Political Row

TOKIO, Feb. 10.—The Japanese Shunpo published the announcement that an extraordinary meeting of the cabinet decided to resign. This was not confirmed, and later it was announced that the resignation of the cabinet was expected to be tendered either on Tuesday or Wednesday.

TOKIO, Feb. 10.—Six persons were killed and 50 seriously injured in the mob attack here today. The situation is very serious. The Japanese Shunpo published the announcement that an extraordinary meeting of the cabinet decided to resign. This was not confirmed, and later it was announced that the resignation of the cabinet was expected to be tendered either on Tuesday or Wednesday.

The Japanese Shunpo published the announcement that an extraordinary meeting of the cabinet decided to resign. This was not confirmed, and later it was announced that the resignation of the cabinet was expected to be tendered either on Tuesday or Wednesday.

Police Drives Mob Back.
A mass meeting was held this evening in Danyan park, in the center of the city. The mob started from there to attack Premier Katsura's dwelling. Police with drawn swords drove them back. The police charged several times, wounding many of the demonstrators.

The crowd reassembled around the building of the newspaper Kokumin Shinbun, with the intention of burning it. The staff of the newspaper offered strenuous resistance with firecrackers, swords and knives. One of the rioters was killed by a bullet fired from the building. This only served to infuriate the mob, which then looted the oil shops and attacked the offices of other newspapers.

In a second attack on the Kokumin Shinbun building, bundles of straw were set on fire and thrown within the building, becoming desperate.

Ask Resignation Cabinet.
Two more persons were killed and more than a score wounded.

Earlier in the day great crowds collected outside the diet, where strong forces of police were drawn up to protect the members. The disorders began with the throwing of missiles at the police. Several times throughout

HAVEMEYER BUTT MAY MAKE HIS HOME HERE

Havemeyer Butt, a nephew of the late Major Archie Butt, special aide to President Taft, who lost his life in the Titanic disaster last spring, is planning to make his home in Colorado Springs, after a visit of two months in the city. Mr. Butt, who came here about December 13, left for a month's trip to Palm Beach, Fla., Saturday, but will return here and plans to purchase a home. Mr. Butt is also a nephew of H. N. Havemeyer, the sugar magnate. He brought his 40-horsepower racing car with him from Washington, D. C., his home, but has taken it to Palm Beach, where he will do some racing during the next few weeks.

(Continued on Page Two.)

MEXICO CITY, Feb. 10.—President Francisco I. Madero is back in the capital palace at night and his wife, Señora Madero, is in the city. The president's brief disappearance from the palace caused a panic, but it appears that he was taken to flight, but it appears that he was absent only a short time, and since then has been spending his time in conferring with General Huerta, Ernesto Madero, the minister of the interior, and other officials.

It is admitted as the national press that General Huerta has been prevented from reaching the capital by the shutting of the railroad between the capital and Mexico. But some of his men have arrived, and it is confidently believed that sufficient troops will soon be mobilized to "warn" an attack on the capital.

This may be initiated early tomorrow morning, but it is not believed even if the chance of attacking is left to the government that it will be before tomorrow afternoon.

Troops Being Mobilized.

It is impossible that today's remarkable situation can be much longer maintained. In addition to a small number of troops from Blanquet's command already in the capital, there is reported to be a force of 1,000 men under General Alvarez in the mountains some 15 miles out, and 25 carloads more en route from the Cuernavaca district.

With whom the sympathies of these men will be, when put to the test, is an open question. They now are particularly believed to be coming to the aid of the administration. An effort has been made by the diplomatic representatives to secure foreign patrols for the district in which most of the foreigners live, since neither the government nor the rebels can provide police protection, but this effort has failed. The American defense committee has instructed the American guard at the embassy to

(Continued on Page Two.)

U.S. WARSHIPS TO MEXICAN PORTS

ONLY PRECAUTIONARY MEASURE

Congress Passes Resolutions Urging Protection of Americans

WASHINGTON, Feb. 10.—The revolutionary uprising in Mexico City completely absorbed the attention today of President Taft and the state, war and navy departments and at the end of a series of conferences, it was determined that all this government could do was to send a sufficient naval force to Mexican waters to afford refuge for foreigners and to observe and report upon conditions in the troubled republic as they develop.

In accordance with this decision, Secretary Meyer ordered the armored cruiser Colorado, now at San Diego to proceed at once to the Mexican port of Mazatlan. Another vessel of the Pacific fleet, probably the armored cruiser South Dakota, also at San Diego, will be dispatched. Also, a gunboat on the west coast of Mexico to take up a post made vacant by the gunboat Denver, which was ordered to Central America.

Send Two Battleships.
It also was decided to send two battleships to the Gulf of Mexico, but the choice of these ships was left to Admiral Badger who was immediately cabled to pick out two ships ready for instant service and to send one to Vera Cruz and another to Tampico. The Colorado, which goes to Mazatlan, is Admiral Southard's flagship, who, it is practically assured, will be in person to Mexican waters.

Though little official information was received by the government from Mexico City, enough facts were at hand to warrant renewal of the determination to keep "hands off" Mexico. In announcing the dispatch of ships to Mexican waters, the state department issued a statement outlining the position of the government. Government Explains Move.
"The sending of these vessels," the state department declares, "indicates no bias on the part of the government of the United States, as to which side shall gain the ascendancy in the

SCOTT AND

(Continued From Page One.)

and found the provisions in good order. The party proceeded on its southern route and came upon Scott's tent, November 12. Within lay the bodies of Scott, Wilson and Bowers. Captain Scott's little son, Peter, is staying with his grandmother at Honolulu. The news was broken to him today.

Geographical Society Informed.

LONDON, Feb. 10.—At a meeting of the Royal Geographical society, tonight announcement was made of the disaster which has overtaken Captain Robert F. Scott's Antarctic expedition.

COLORADO SOUTHERN
HOUSTON
Where Seventeen Railroads Meet the Sea
Known as "The Magnolia City"—Houston has much of variety to offer the winter tourist. It is a great and beautiful city—the central point in the rich coast belt—backed by the tremendous agricultural empire of the Lone Star state. Its markets are among the world's greatest—its wholesale and manufacturing interests enormous—its commercial life active and progressive—its future assuredly great.
The mild and delightful climate of the Gulf prevails in Houston, making it practically a year-round resort. Its finely paved streets and three hundred miles of shell-grated roads are among the best in the state for riding, driving and motoring. Excellent boating, bathing and fishing may be had at the seaside, within half an hour's ride. Houston is noted for its social life and the stranger is met with the Southern hospitality. Houston's splendid hotels are among the noted hostleries of the South, the New Bender, the Bristol, the Brazos and the Maricote being among the most prominent.
The Colorado & Southern Lines
provide the shortest route via Fort Worth and Dallas to Houston, as well as to Galveston, San Antonio, Austin, Waco, Beaumont and many other Texas and Southern points of interest. "The Gulf Coast Limited," an up-to-date train, leaves Colorado Springs daily at 2:55 p. m.—saves miles of travel and hours of time.
A Copy of "Summit to Sea"
fully illustrated, interestingly written, descriptive of Texas, the Gulf Coast, and other Southern resorts will be mailed post free on request. Or copies may be had at our
City Ticket Office, 119 E. Pikes Peak Ave.

Party Well Equipped.

No party ever so well equipped as the expedition from Captain Scott's base, to meet the end of the poles. But Antarctic travel would not be what it is, a training ground for the highest qualities of the British race if these perils could be avoided.

Sailed June 10, 1910.

The Terra Nova sailed on June 10, 1910, for New Zealand and for South pole. It was towed by a motor launch, F. Scott, a few days later.

Only Brief Bulletins.

Only a few brief bulletins were sent today from the New Zealand port of Gannett by the captain of the Terra Nova, who related simply the fate of the party and then proceeded with his vessel for the port of Linton, where he should arrive Thursday.

Reached Pole January 18, 1912.

The date of Captain Scott's attainment of the South pole, January 18, 1912, shows that he reached the goal

The Best Cough Syrup is Easily Made at Home

Costs Little and Acts Quickly. Money Refunded if It Fails.

This recipe makes a pint of cough syrup, and saves you about \$2.00 as compared with ordinary cough remedies. It stops obstinate coughs, even whooping cough—in a hurry, and is splendid for sore lungs, asthma, croup, hoarseness and other throat troubles.

Mix one pint of granulated sugar with 1 1/2 pints of warm water, and stir for 2 minutes. Put 2 1/2 ounces of Pinex (differ cents' worth) in a pint bottle, and add the Sugar Syrup. Take a teaspoonful every one, two or three hours. Tastes Good.

This takes right hold of a cough and gives almost instant relief. It stimulates the appetite, and is slightly laxative—both excellent features.

Pinex, as perhaps you know, is the most valuable concentrated compound of Norway white pine extract, rich in ginseng and the other natural healing pine elements.

No other preparation will do the work of Pinex in this respect, although strained honey can be used instead of the sugar syrup, if desired.

Thousands of housewives in the United States and Canada now use this Pinex and Sugar Syrup recipe. This plan has often been imitated, but the old successful formula has never been equalled. Its low cost and quick results have made it immensely popular.

A guarantee of absolute satisfaction or money promptly refunded, goes with this recipe. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

Mrs. Scott Uninformed.

Mrs. Scott, now in London, the widow of the British Antarctic explorer, though she is not probably unaware of his fate, is not yet informed of his death.

American Pays Tribute.

WASHINGTON, Feb. 10.—When news of the death of Captain Scott and his companions reached headquarters of the National Geographic society, Gilbert H. Grosvenor, the director, said:

"Everyone who has followed carefully the progress of polar exploration, and the great speed with which they were able to travel was due to the fact that they were experienced handiers of dogs and always depended upon dogs to do their traveling. In the event they are successful, the party was due to reach the South pole in a few days."

The efficiency of Peary and Amundsen and the great speed with which they were able to travel was due to the fact that they were experienced handiers of dogs and always depended upon dogs to do their traveling. In the event they are successful, the party was due to reach the South pole in a few days.

As Amundsen's expedition was a success, it is probable that the party was due to reach the South pole in a few days.

As Amundsen's expedition was a success, it is probable that the party was due to reach the South pole in a few days.

Mrs. Wilkes' Fondest Hopes Realized—Health, Happiness and Baby.

Plattsburg, Miss.—"Lydia E. Pinkham's Vegetable Compound has proved very beneficial to me, for now I am well and have a sweet, healthy baby, and our home is happy."

"I was an invalid from nervous prostration, indigestion and female troubles."

"I think I suffered every pain a woman could have before I began taking Lydia E. Pinkham's Vegetable Compound, and I think it saved this baby's life, as I lost my first one."

"My health has been very good ever since, and I praise your medicine to all my friends." Mrs. VERNIA WILKES, R. F. D. No. 1, Plattsburg, Miss.

The darkest days of husband and wife are when they come to look forward to a childless and lonely old age.

Many a wife has found herself incapable of motherhood owing to some derangement of the feminine system, often curable by the proper remedies.

In many homes, once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

PROF. PALMER TO TALK TO WINTER NIGHT CLUB

Prof. George Herbert Palmer of Harvard university, exchange professor at Colorado college, will be the principal speaker at a meeting of the Winter Night club to be held at the Antlers hotel this evening. Prof. Palmer will talk on "Commercial Relations of Colleges to the Community." Dinner will be served at 7 o'clock.

SCOTT AND

(Continued From Page One.) and found the provisions in good order. The party proceeded along the southern route and came upon Scott's tent, November 12. Within lay the bodies of Scott, Wilson and Bowers. Captain Scott's little son, Peter, is staying with his grandmother at Henry. The news was broken to him today. In 1911 Mrs. Scott had cinematograph pictures of Peter at play made and sent them out so his father could see how the boy was growing. It is not known whether Captain Scott ever received them.

Geographical Society Informed. LONDON, Feb. 10.—At a meeting of the Royal Geographical society tonight announcement was made of the disaster which has overtaken Captain Robert F. Scott's Antarctic expedition.

HOUSTON Where Seventeen Railroads Meet the Sea

Known as "The Magnolia City"—Houston has much of variety to offer the winter tourist. It is a great and beautiful city, well situated on the coast, backed by the tremendous agricultural empire of the Lone Star state. Its markets are among the world's largest. Its wholesale and manufacturing interests are of a magnitude that is almost unparalleled. Its life is a veritable feast.

The Colorado & Southern Lines provide the shortest route via Fort Worth and Dallas to Houston, as well as to Galveston, San Antonio, Austin, Waco, Beaumont and many other Texas and Southern points of interest. "The Gulf Coast Limited"—an up-to-date train, leaves Colorado Springs daily at 2:55 p. m., saves miles of travel and hours of time.

A Copy of "Summit to Sea" fully illustrated, interestingly written, descriptive of Texas, the Gulf Coast, and other Southern resorts will be mailed post free on request. Or copies may be had at our City Ticket Office, 119 E. Pikes Peak Ave.

STEAMSHIP TICKETS EVERYWHERE

MRS. GROVER CLEVELAND AND PROF. I. J. PRESTON ARE WED

PRINCETON, N. J., Feb. 10.—Mrs. Grover Cleveland and Thomas J. Preston were married at 10:30 o'clock this morning by President John Grier Hibbin of Princeton university, in Prospect, the executive residence of the university. No preliminary announcement has been made, and the utmost simplicity was observed in the ceremony. The ceremony was performed in the main drawing room of President Hibbin's home, the room being decorated with an extensive bank of palms and flowers. Mrs. Cleveland and Mr. Preston stood at the east end of the room, while the guests were ranged along the opposite side. The servants from the Cleveland household were also present.

Professor Preston and members of his family, including his father and mother, Mr. and Mrs. Thomas Preston of Aurora, N. Y.; his brother-in-law and sister, Mr. and Mrs. John Hoppen of South Orange, N. J., and his sister, Mrs. Florence Preston Jones of South Orange, arrived in Princeton, N. J., directly to "Prospect" where they met Mrs. Cleveland, her debutante daughter, Esther, her younger daughter, who came from school in Connecticut, and one son.

Richard Cleveland, the eldest son, did not arrive from the Eastern academy in time for the marriage. Esther Cleveland and Harry Preston, brother of the bridegroom, stood beside the couple during the ceremony.

Sailed June 10, 1910. The Terra Nova sailed on June 10, 1910, for New Zealand and the South Pole. It was joined by Captain Robert F. Scott a few days later at Cardiff. The expedition consisted of 23 officers and scientists in addition to a crew of 33 picked men from the British Royal navy.

Reports were current at the time the Terra Nova sailed for the Antarctic, on December 14, 1912, to bring back the Scott party, that some of the members of the relief expedition had expressed grave doubts as to whether Captain Scott and his fellow explorers would ever return. No reason was given for these doubts, but they were freely brooded abroad.

Mrs. Scott left London five weeks ago for New Zealand to meet her husband there. The last direct word received from Captain Scott himself was brought by the commander of the Terra Nova from the southern ice regions when she returned to Akaroa, New Zealand, on March 13, last year. The brief message was in Captain Scott's own hand writing and said:

"I am remaining in the Antarctic for another winter to continue and complete my work." Captain Scott had shortly before sent back a report to his base at McMurdo sound, showing that on January 3, 1912, he had reached a point 150 miles from the pole and was advancing towards his destination.

The dispatch from Gannam, New Zealand, this morning, shows that in 15 days he covered the remaining 100 miles, having traveled at the rate of 30 miles a day.

It was on his return that he and his party were overwhelmed by one of the terrific blizzards so prevalent in the Antarctic region.

Reached Pole January 12, 1912. The date of Captain Scott's attainment of the South pole, January 12, 1912, shows that he reached the goal.

The Best Cough Syrup is Easily Made at Home Costs Little and Acts Quickly. Money Refunded if It Fails. This recipe makes a pint of cough syrup, and saves you about \$2.00 as compared with ordinary cough remedies. It stops obstinate coughs, even whooping cough, in a hurry, and is splendid for sore lungs, asthma, croup, hoarseness and other throat troubles. Mix one pint of granulated sugar with 1/2 pint of warm water and stir for 2 minutes. Put 2 1/2 ounces of Pinex (fifty cents worth) in a pint bottle, and add the Sugar Syrup. Take a teaspoonful every one, two or three hours. Tastes Good. This takes right hold of a cough and gives almost instant relief. It stimulates the appetite, and is slightly laxative. Both excellent features. Pinex, as perhaps you know, is the most valuable concentrated compound of Norway white pine extract, rich in guaiacol and the other natural healing pine elements. No other preparation will do the work of Pinex in this recipe, although strained honey can be used instead of the sugar syrup, if desired. Thousands of housewives in the United States and Canada now use this Pinex and Sugar Syrup recipe. This plan has often been imitated, but the old successful formula has never been equaled. Its low cost and quick results have made it immensely popular. A guarantee of absolute satisfaction, or money promptly refunded, goes with this recipe. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

ONE DOSE RELIEVES A COLD—NO QUININE

Pape's Cold Compound cures colds and grippe in few hours. Tastes nice—Acts gently.

You can cure colds and grippe and break up the most severe cold either in head, chest, back, stomach, or limbs by taking a dose of Pape's Cold Compound every two hours until three consecutive doses are taken.

It promptly relieves the most miserable headache, dizziness, head and nose stuffed up, feverishness, sneezing, sore throat, mucous catarrhal discharges, running of the nose, soreness, stiffness and rheumatic twinges. Take this wonderful Compound as directed, without interference with your usual duties and with the knowledge that there is nothing else in the world which will cure you so fast of cold, grippe, misery, as promptly and without any other assistance or bad after effects as a potent package of Pape's Cold Compound, which any druggist can supply, accept no substitute. Contains no quinine—belongs in every home. Tastes nice. Adv.

most heroic and dauntless of English explorers and we regret that the ambition of his life was realized before the end.

Blizzard Not Responsible. NEW YORK, Feb. 10.—No blizzard could have killed an experienced explorer as Scott declared. Vilhjalmur Stefansson, discoverer of the blonde Eskimos in Arctic regions, if many in the Scott expedition perished it was through starvation; if a few, death may have been due to a fall into a crevasse, is the opinion of Stefansson. "Out on a western prairie a rancher might get caught in a snowstorm unaware and be frozen but not in the Arctic regions where a man is armed, fed and exposed," he said. "Barring cold and exposure, starvation is the only thing that can have killed Scott." "Just what caused the disaster it is impossible to say with any accuracy, if it were only a question of Scott himself and perhaps one or two others, a fall into a crevasse might account for it, but we must fall back on starvation as the explanation of the death of any larger number."

Peary is Shocked. WASHINGTON, Feb. 10.—Rear Admiral Robert E. Peary, U. S. N., retired, who averaged a gold medal and the thanks of congress as the first man to attain the North pole said when he received today the news of the death of Captain Scott and his companions: "The news comes to me as a terrible shock. Mrs. Scott and the wives and relatives of the brave men who perished with Captain Scott and the whole British nation have my deepest, sincerest and most heartfelt sympathy and condolence."

Admiral Peary at present is recovering from a surgical operation. Rear Admiral Chester, retired, a conspicuous figure in Polar exploration, officials of the National Geographic society and the entire colony of scientists here, who had been watching the race to the South pole, were shocked by the news of the catastrophe.

Amundsen Lauds Intrepid Scott. MADISON, Wis., Feb. 10.—Captain Roald Amundsen forgot his own distinction as discoverer of the South pole tonight in expressing his profound grief over the tragic fate of Captain Robert F. Scott in Antarctic seas. Captain Amundsen was loath to believe the news, especially as to the cause of the death. "I gladly would forego any honor or amount of money if thereby I could have saved Captain Scott from his terrible death," said the Norwegian explorer at his hotel tonight. Cable dispatches from London were received by the explorer today. They repeated the press news that the Scott party had perished, leaving proof of Amundsen's discovery of the pole. Captain Amundsen was extremely cautious in his comments on the reported tragedy. He said to all interviewers that un-

when he had received absolutely authentic information he would withhold a statement on the subject. I am inexpressibly shocked at the news of Captain Scott's terrible end and that of his brave party," said the explorer. "But until more definite advice are received, I do not feel able to discuss it. I expect to get this information later." Scores of telegrams from London and throughout this country asking for comment on the Scott expedition and its fate remained unanswered by Captain Amundsen. Captain Amundsen today commented on the existence of crevasses and the prevalence of sudden mountain storms that sweep around the Antarctic crags, and said it was possible Scott was caught in one of these storms. Amundsen's party often was greatly alarmed by these sudden changes, particularly

TUESDAY, FEBRUARY 11, 1913

AID FOR THE MINING INDUSTRY

THE American Mining Congress, through its secretary, James F. Callbreath, is making a renewed effort to obtain from Congress more generous support of the Bureau of Mines. Mr. Callbreath contends that our government alone of all important governments in the world persists in treating the mining industry as of small importance, and it would appear from his argument that this statement is justified.

For fully a half century Congress has treated the agricultural industry with extreme generosity. It established agricultural colleges in all of the states and has given them liberal appropriations. Recently it voted an additional \$3,000,000 for the extension of their work, and in a report which accompanies the data a statement was made of the sums which have been voted up to the present time for the encouragement of agriculture. In round numbers it has spent on them not less than \$70,000,000, and in addition about \$15,000,000 a year is required for the exclusively agricultural work if the Agricultural Department. With the additional sum just voted the yearly cost of the Federal aid given to agriculture will be at least \$22,000,000.

Certainly no intelligent person begrudges this expenditure, for it is largely because of government aid that the farming industry has attained its present position. But it is instructive to contrast these generous appropriations with the meager sums voted for aid and encouragement to the mining industry. About 700,000 men work underground in this country, including those in both the coal and metal industries. The work is extremely hazardous, as is shown in the annual death roll of more than 4,000 killed and 60,000 injured. It is estimated that this means 2,500 widows and 15,000 fatherless children every year.

The Bureau of Mines is supported by a Federal appropriation of \$500,000 annually, while the Geological Survey received \$1,500,000, a considerable part of which is expended for the benefit of agriculture and other industries. This total of \$2,000,000 defines the extent of Federal aid to the mining industry. Yet the Bureau of Mines is accomplishing excellent work on the all-important problem of reducing mine fatalities. In 1907, when it began this work, 6,93 men were killed in the United States for each million tons of coal produced. By 1911 the number had been reduced to 5.48, and last year it was 4.32. Nevertheless, a comparison of these figures with those of foreign countries shows that fully one-half of the number of deaths in American mines are avoidable. Because of lack of money the work of the Bureau has been confined to coal mines, and nothing has been done in regard to the deaths in metal mines where the rate is higher, or in quarries where it is still higher.

Another factor in the problem is the steady decline in metal production. In 1906 the production of gold, silver, copper and lead in Colorado, Montana and Idaho was \$298,000,000 in comparison with only \$251,000,000 in 1910, a loss of nearly \$50,000,000. In 1900, 40,000 miners were employed in Colorado, but in 1910 the number had fallen to 19,000, and a marked decline was also apparent in the other two states named. Similarly the precious metal production of Colorado has declined from \$50,000,000 in 1906 to \$32,000,000 in 1910. The reason, in Mr. Callbreath's opinion, is that "the days of bonanza mining are gone, and we are now down to the treatment of low-grade ores. This has led to a series of perplexing problems. Their solution is beyond the reach of private capacity, and they can only be solved through the aid of the Federal government. And until they are solved the Western mining industry will continue to decrease in the value of production and the number of men employed."

The Bureau of Mines has asked for an appropriation of \$250,000 with which to begin work on such problems, and in view

of the liberality with which Congress votes many times this sum annually for the support of agriculture there should be no difficulty in getting it, but the traditional unwillingness of Congress to give anything but most meager aid to the mining industry makes it extremely doubtful whether the money will be forthcoming.

THE LAW'S DELAYS

IF Hamlet could return to earth today and observe the course of American legal procedure he would be more than ever convinced of the correctness of his much quoted remark concerning "the law's delays." For instance:

About six years ago (we are not sure it was not even longer) the City of Colorado Springs lost a suit in the District Court to compel the Electric company to sell its current for municipal purposes under the "most favored customer" clause of the Jackson franchise, at the rate of .585 cents per kilowatt hour. The City subsequently appealed the case to the State Supreme court, where it has been ever since.

On December 18, 1911, City Attorney McKesson argued the case before Judges Karrison, Bailey and Hill. Under the rules of the Court if these three judges had reached an agreement it would stand as a final decision. But after pondering over it for a mere trifle of fourteen months they have now announced their inability to agree. The result is that if the City wishes to continue the case it must be argued again before the entire Court, who will then take it under advisement and eventually, perhaps, render a decision based on the majority finding. How much more time would thus be frittered away nobody knows or can know. It is not at all impossible that another fourteen months, or even more, would pass without a decision being made, not counting the additional delays which would ensue before the next argument of the case.

We understand that it is treasonable and seditious to criticize a Court. But if it is true that "justice delayed is justice defeated," here is a perfectly plain case where criticism is due. Just why three presumably learned justices of the highest court in the state should require fourteen months in which to make up their minds whether they could or could not agree on a decision of this case is hard for the layman to understand.

Nevertheless there is a hopeful side to this matter. Every fresh instance of the stupid inadequacy of our judicial procedure adds to the power of public opinion which before many years will force a change.

FIGHTING THE LOAN SHARKS

A FEW days ago President Taft signed a bill intended to put a stop to the loan shark evil in the District of Columbia. It is a pity that the measure cannot be applied to the entire country, for the loan shark is a pest that ought to be wiped out along with the hookworm and other undesirable.

The new law limits the legal interest rate to 12 per cent per annum and includes pawnbrokers in its operations. The prevailing rate charged by the loan sharks is from 120 to 240 per cent, and it often happens that when the victim gets through paying it, indeed, he ever gets through the interest rate has mounted up into the thousands.

The poor and improvident classes of Colorado, in common with those of most other states, have suffered severely from the operations of loan sharks, and the present legislature could not better occupy a portion of its time than by passing a drastic law to put them out of business.

OPEN PARLIAMENT

[All letters intended for the Open Parliament must bear the name and address of the writer, not necessarily for publication, but as an evidence of good faith. Controversial letters will not be published without the signature of the writer. Communications for this department should be limited to 400 words and should be free from personalities.]

WHAT IS A GROUNDHOG.

To the Editor of The Gazette.

Will you please settle a dispute for me? I contend that groundhog and woodchuck are but different names of the same animal, and that likewise skunk and polecat refer to one animal, porcupine and hedgehog to another. The person with whom I have been arguing contends that each of these names refers to an entirely distinct animal.

WILLIAM KIPLING.

Colorado Springs, Feb. 10.

According to the American Encyclopedia: "Woodchuck and groundhog are the common names of the same animal." "Skunk" covers several genera of small carnivorous mammals of the weasel family (mustelidae), of which there, with the badgers, constitute the subfamily melleinae, while "polecat" is defined as a small European carnivorous mammal, a member of the weasel family. It is further stated, however, that the term "polecat" has been applied to the American skunk and other stinking animals.

"Porcupine" is a rodent of the family hystricidae. "Hedgehog" is a small insectivorous mammal of the old world family erinaceidae, and especially of the genus erinaceus, characterized by its coat of stiff spines. It is expressly stated: "No true hedgehogs exist in America; the animals often so-called being the very different porcupines."

You are right, then, as to your contention that woodchuck and groundhog are interchangeable, skunk and polecat practically so, but porcupine and hedgehog are distinct animals.—Editor.]

FROM OTHER PENS

LIBERTY BELL.

From the Kansas City Journal.

Whenever it is proposed to remove the famous old Liberty Bell from its sanctuary in the City of Brotherly Love and send it on a temporary mission of patriotism and instruction to a national exposition, the good people of Philadelphia usually go into spasms of protest. To their minds this is a kind of profanation, as though it were proposed to disinter the sacred bones of old Ben and drag them across the country in a side-show. But in spite of objections, the bell has made six trips from Independence hall. It went to the Cotton exposition in New Orleans in 1885; to the Columbian exposition in Chicago in 1893; to the Atlanta exposition in 1895; to the Interstate and West Indian exposition at Charleston in 1902; to the celebration of the Battle of Bunker Hill in Boston in 1903, and to the St. Louis exposition in 1904. Now it is proposed to take it to San Francisco, to the Panama exposition.

As the bell which rang freedom and independence for the American colonies, and which was "heard around the world," Liberty Bell has become enshrined in the hearts of a patriotic people. It does not belong to Philadelphia any more than to other American cities. Charles W. Fairbanks spoke for us all when he said in a speech delivered in St. Louis as the old bell was about to be taken back to Philadelphia: "This relic of patriotism is at home, and loving sentiment surrounds it wherever the flag of the United States waves, and wherever loyal sons gather to pay respect to the immortal fathers who answered its call to arms. The thousands who have seen it will leave with a higher regard for our institutions, and a constant reminder to future ages of what this bell made possible in this land of ours." Truly, the bell is at home wherever the flag waves.

What are the objections to taking this prized relic to San Francisco? The chief one is that the bell is cracked and that transportation over so great a distance would endanger the condition of the metal, causing the crack to grow larger. But after all, what harm can come of such damage? It is not expected that the bell will ever ring again. That is impossible in its present condition. Even if the crack enlarges or if the bell breaks in two, it will be still the same sacred relic endeared all the more because it has been useful in stimulating patriotic devotion in all parts of the republic. It is true that this bell is enshrined in Philadelphia where even the people of that city seldom see it. Philadelphia is not a mecca for travelers, not even for the casual native tourists of our own country. Why shouldn't this bell be taken where the people can see it? It belongs to them quite as much as to the citizens of Philadelphia. Better a thousand times that it should continue to arouse patriotism in the hearts of the American people than that it should be buried in the seclusion of a place not often visited.

NEAR TO NATURE

AN IMMORTAL'S WEEK-END.

From the Beaver Dam Citizen.

Guy Jake went to Milwaukee this morning where he will visit over Sunday.

THE HEIGHT OF LUXURY.

From the Chicago Tribune.

Sir: Speaking of "a small demi-tasse of black cafe noir," a European tourist agency advertises a "luxurious Cairo-Luxor train de luxe."

"EXPLICIT"

DEPENDING, OF COURSE, ON THE WEATHER.

From Printer's Ink.

A concrete example may serve to make this clearer. A woman wants to buy a ready to wear suit, a corset, silk hose, and various less important articles.

Brooding One's Sympathies

By RUTH CAMERON.

The more we know the better we forgive.

Whoever feels deeply feels for all who live.

It has often surprised me to find that women who towards their own family and their own intimates are the most tender-hearted and sympathetic creatures in the world, are sometimes lacking in human feelings towards all outside of that narrow circle—especially towards those in the so-called "lower classes."

I am thinking of a certain woman who is self-sacrificing to a fault towards her own brood and cannot do too much for them. From seeing her in her family circle, I had imagined her to be full of charity and kindness to all the world. Now I happened to be at her house one morning when the young woman who does the washing, failed to appear on the scene. Instead she sent a message to the effect that she was obliged to stay with her mother who was seriously ill with acute indigestion. She said she would come just as soon as possible.

I expected to find my friend full of sympathy. Instead she said fretfully: "Well, isn't that annoying. I should think she might have found someone to stay with her mother. She knows how it puts me out to have my washing late."

Just think of that! Suppose one of that woman's children had been seriously ill and needed her on the spot, that she had some engagement the breaking of which would inconvenience the other party. Can you imagine her getting someone else to stay with the child while she kept the engagement? I can't. And yet just because the washerwoman belonged to another class, she thought the poor girl ought to put aside all human feeling and keep her engagement, no matter how sick her mother might be.

Again, I know a young matron who is ridiculously helpless in taking care of her two babies. She has two maids to help her with the children and the housework. Finding that she was to be without a nurserymaid for a week, she engaged an accommodator to fill in the terrible gap. The accommodator sent word a few days beforehand that she could not come because her married sister needed her, as her three babies were ill and she had no one to help her. And can you believe it, that woman who could not take care of her two healthy babies with the help of one maid, thought it absurd that the other woman needed someone to help her with three sick children.

An expressman told me that a woman who is supposed to be a very kind-hearted person actually told him to carry in the trunks so that his hands and not her beloved wall paper would get jammed.

To be sympathetic and tender-hearted towards those near and dear to you is certainly a virtue. But I can't think it counts for very much if it is counterbalanced by a total lack of human feeling for those outside the charmed circle.

Remember, "He who feels deeply, feels for all who live."

The Clarinet

By GEORGE FITCH.

Author of "At Good Old Siwash"

The clarinet is the instrument which supplies the embroidery in brass band music. The careful listener to a brass band in full eruption will detect a querulous instrument running up and down the scale like a squirrel chasing himself around a tree. This is the clarinet. It is the most agile of instruments and can climb two octaves up the scale and turkey trot back while the bass horn is grunting twice.

The clarinet consists of a wooden tube full of scientifically located holes.

Can climb two octaves up the scale and turkey trot back while a bass horn is grunting twice.

It also has a mouthpiece with a reed built in. To operate the clarinet, the performer swallows as much of this mouthpiece as possible, covers 21 holes with his 10 fingers and thumbs and then blows from the corner of Main and Market streets until 9:15 p. m.

Clarinet playing does not require vast lungs, but the player must have great quantities of intelligent fingers. Every time he lifts a finger he allows a note to escape into the open air and the man who is inclined to sutter with his index finger would very quickly fill an overture full of un-called-for and egregious tones. A good clarinet player can produce 80 notes a minute for half an hour at a time before his finger joints become overheated. Those who have watched a bug-eyed clarinetist trying to keep up with the conductor during a rendition of the second Hungarian Rhapsody, and have noted the furrowed brow in which he attempts to match a breath every other minute while playing a whole bar full of eight notes per bar of music, have gone away dazed and impressed.

The clarinet sounds better by itself than the cornet or the bass horn, but it is not loved for itself alone and is never allowed to monopolize the attention of the audience. A grand opera Wagner was particularly cruel to clarinetists and was never so happy as when writing clarinet parts which require the player to water-jacket his fingers and inhale oxygen between acts.

A good clarinetist can make \$50 a week, but this only palliates his profession.

(Copyrighted by George Mathew Adams.)

ROOSEVELT AT ORONIS WOULD PUSH HEARING

MARQUETTE, Mich., Feb. 10.—Circuit court today moved for a continuance of 30 to 40 days of the trial of the libel suit against his client by Col. Theodore Roosevelt. The motion was opposed by counsel for Colonel Roosevelt. Flanagan has taken the matter under advisement.

R. MEN TAKE NOTICE.
Conductor S. L. Miller, Norfolk, Neb., on Bonsteel Division of C. & N. W. Ry. Co., recommends Foley Kidney Pills with very satisfactory results and endorse their use for any one afflicted with kidney trouble. They are all right. All railroad men are prone to kidney and bladder troubles due to the constant vibration of the cars. Foley Kidney Pills are a brace and strengthening kidney medicine that will always help. No habit forming drugs. The Robinson Drug Co.

Leipzig is to have a library where in will be collected the entire literature of the German empire that was completed or begun after Jan. 1.

ELIOT DOESN'T WANT TO BE AN IMMORTAL

(Copyright by Chickering.)

President Emeritus Eliot of Harvard says that he does not want to be an "immortal." When asked why his name did not appear in the list of 50 immortals approved by the senate as the original members of the American Academy of Arts and Letters, the venerable savant said that already he belonged to too many societies and associations, and that he did not intend to affiliate himself with any others.

WHEN YOU HAVE A GIFT TO BUY TRY HARDY'S FIRST

HARDY'S

16 N. Tejon

THIRTY YEARS AGO TODAY

February 11, 1883.

Marshall Newman, a well-known colored man, went violently insane and attacked his wife and various other people with a carving knife. He was captured by the police and put in jail after a fierce struggle.

A railroad from Del Norte to Summitville was projected. It was estimated that it would cost upwards of \$350,000. This railroad was never built.

Hon. Lyman K. Bass left for the east.

Twenty Years Ago Today

February 11, 1893.

Rumors of a great strike of silver ore north of Cripple Creek were being freely circulated, but no statements as to its exact locality could be obtained.

A reported riot strike in the Orphan Belle property at Cripple Creek caused some activity in its stock.

The subject of the spring election had begun to agitate the minds of the politicians. Judge Severy was being talked of as a possible candidate for mayor.

THE HASKIN LETTER

FROSTS AND FRUIT

By FREDERIC J. HASKIN.

The recent great freeze in the citrus fruit districts of California, whereby some three-fourths of all the oranges were so badly frozen as to warrant their exclusion from interstate commerce under the pure food laws, came in spite of the practice which now obtains in many quarters of spreading orchards to prevent frost. The test which will determine the fitness of California oranges to go upon the market this year will be the cutting into two halves of oranges selected at random from each lot, and if they reveal more than one-fifth of each orange to be pulpy and without juice, they cannot be sold. This law will hit California very heavily this year, since the orange is the backbone of the citrus fruit industry, as the fruit industry is the backbone of California's crop yield. Of the 1,000,000 trees of the state were to be planted in one grove, with 30 trees to the acre, it would make a great grove, a mile wide and 25 miles long. California has more than fifty million fruit and nut trees, three-fourths of them in bearing. In addition to these it has 125,000,000 grape vines. There are 8,000,000 bearing and 4,000,000 growing lemon trees in the state, with 1,000,000 lemon trees besides. Last year's citrus fruit yield exceeded 3,000,000 boxes, and brought nearly \$18,000,000 wholesale.

Most orchardists and growers of semitropical products have learned that it is a cheap investment to take precautions to save their crops from killing frosts. Traveling through the Ozark region of Missouri, one may pass thousands of acres of fruit trees, and everyone of them will be protected in frosty weather by crude oil, burning or smudge pots and spreading a heavy pall of smoke over the orchards. The son of one of the leading statesmen of the '80s and '90s, a man who came close to becoming the nominee of his party for president, had a very large orchard. One year there was a cold wave. At an outlay of some \$5,000 dollars for smudging he saved his crop of apples and sold it for \$35,000, while his neighbors who used no smudges had no apples. After that he had plenty of imitators.

Good Frost Preventative.

But there was one thing, in which they could not imitate him. During his famous service in congress he accumulated a lot of worthless documents, most of them Congressional Records, and the son found them occupying all the storage room in the family residence. So he decided that he would use them for wicks in his smudge pots; and furthermore, he found that congressional "hot air" combined with the smoke of crude petroleum made a most excellent preventive of frost.

The principle upon which frost prevention by smudging is based is that of air drainage. Cold air seeks the low ground just as water seeks the ocean, and anything that will help to drive it out and force it to mix with other strata of air tends to reduce the possibility of frost. In order to overcome frosts three methods have been tried—explosions, smudging, and heating.

Explosives were first used in France to protect the grape crop. Later Albert Singer, an Austrian vine-grower, who owned extensive vineyards in the lower slopes of the Bacher mountains was much troubled with hail storms. He decided to drive the clouds away by the use of explosives. He established a series of six mortar stations on a range of the surrounding mountains, each built of wood and sheltering to heavy mortars, each of them loaded with a charge of four and a half ounces of powder. He manned these stations with volunteers made up from the small vineyard owners around him, and as soon as a storm came into sight all hands repaired to their respective posts and fired the mortars simultaneously until the cloud was scattered or blown away. The experiment is declared to have been a success.

Sun Does Most Damage.

The greatest damage done by frost to fruit buds is not, in reality, the work of the frost itself, but of the sun the morning after. That is why the smudge comes in so well. It not only has a tendency to prevent radiation, and therefore, like the clouds, to prevent frost, but more important, it

prevents the sun's rays in the early morning after from striking the buds while the frost is upon them. Some of the early attempts to make smudges consisted of heaps of sawdust and like inflammable materials burnt at sunrise on frosty mornings. Another plan was to make steam enough to cover an orchard like a fog, but that did not work.

When the lemon growers of California started in to grow lemons they planted their trees down in the valleys. The result was that whenever there was a still, cold, clear morning, the snowbreath of the mountain peaks slipped down into the valley and nipped the buds. Then someone thought that if the groves were planted along the higher plateaus, the cold air would not be able to stop enroute to the valleys below, and the lemons would therefore be immune from attack. And so it proved, and that is why California fruit farms so well.

Another method of preventing damage by frost consists of heating an orchard. One man patented a wire basket which held some kerosene and coal. These were used, about 25 to the acre. Another invented a briquet composed of sawdust, oil refinery refuse and low grade oil. In California oil heaters are used. One type consists of a sort of rasked affair with a central draft tube. It weighs, with the covering, less than two pounds, but holds seven quarts of oil, enough to burn 10 hours.

Colorado Example.

For several years thrilling frost fights were held by the orchardists of Colorado, and at last, in 1908, two men saved half of their crops by heating their orchards, and lost the other half. The object lesson was so striking that the growers at Canon City appointed an orchard-heating committee, the first in the history of orcharding. With \$1,000 at their disposal they made expensive experiments in frost damage prevention, and finally came to the conclusion that heating with oil was the best procedure. Now, in some sections of the state, every commercial orchard has its heating or smudging equipment.

A member of that committee afterward reported to the department of agriculture that the orchard heating campaign saved \$4,000,000 worth of fruit to the state. They could raise the temperature 14 degrees, with 100 pots to the acre. In one orchard several acres were left unprotected, and while the remainder of the orchard yielded a bumper crop—15,000 boxes—there was not a single box of apples on all the unprotected trees.

Some orchardists have gone so far as to install thermometers in their orchards, which are, in turn, connected with electric bells in their bedchambers. The moment the mercury falls to a certain point, the thermometer recognizes it, and immediately starts the bells ringing, that call out the help. These installations are said to cost about \$20. Another device is added to another orchardist's. His oil heaters wired up so that, by means of spark plugs, he can light them all simultaneously.

Resort to Subterfuge.

There are innumerable industries depending on frost conditions. Sugar cane, for instance, reaches its maximum yield when allowed to stand to the point of full maturity. Yet cold weather often ruins the cane, and the grower is put to it to devise ways and means of saving his crop. When the weather bureau sends out its warnings the cane is cut close to the ground and placed in long windows, so that only the cane on top suffers. Another method is to cut one row over the next one so that the leaves of the one protect the buds of the other.

In shipping ice in cold weather ice is put in the refrigerator cars to keep it from freezing, just as in summer it is put in to keep the fruit cool.

During the recent frost in southern California one large orange grower saved his 300-acre grove from loss by employing no less than 2,500 persons for three days in keeping his smudge pots burning. He introduced the novel method of placing the smudge pots on standards 35 feet high, as the trees instead of placing them on the ground. In this way he created a pall of dense

ELKTON SHOWS PROFIT
OF \$215,000 IN 1912

A net profit of \$215,000 and dividends of \$150,000 during the last year was shown yesterday in reports presented at the annual stockholders' meeting of the Elkton Consolidated Mining company, held in the Mining Exchange building. The report was approved by the stockholders. The matter of the construction of another mill was not brought up, and it is believed by many men to be unwise at the present time.

GOLD DUST
makes dish water that dyes

Gold Dust offers the shortest time from the druggery of dish washing. Just a little Gold Dust shaken in your dish water will remove the grease and dirt. Gold Dust digs deep into cracks and corners, purifies and drives out every bit of dirt hidden germs which soap and water will not reach. Gold Dust sterilizes as well as cleans. If you spend two hours a day washing dishes, Gold Dust will enable you to save one hour and your dishes, too, will be spotlessly clean, wholesome and sanitary.

the GOLD DUST TWINS do your work

ATTORNEY GENERAL RETURNS TO DENVER

Finishes Probe of Stratton Estate
Records Work on Home Begins

Work on the first 13 buildings of the Myron Stratton home was started yesterday morning at Broadmoor by Edward H. Hinn, who was awarded the excavating contract by J. J. Cooke, the general contractor. Cooke will be here tomorrow to supervise the work and has planned to rush the preliminary steps in the construction. Hinn had charge of the excavating on the streets of Colorado Springs last summer, preliminary to the paving. Other subcontracts probably will be let today by Mr. Cooke, with the approval of the trustees.

Having finished his investigation of the records of the Stratton estate, Attorney General Farrar has returned to Denver, where he will prepare his report to the legislature. He said that he would send two experts to this city today to go over the court records. The attorney general did not find any evidence of mismanagement of the Stratton millions, so far as careful conservation and handling of the properties is concerned. He is not yet prepared to state whether the delay in providing for the Stratton home has been justified or not. An examination by the experts of court records will answer this question, it is believed. He intends to check up on every claim and suit filed against the estate and to ascertain whether all claims paid have been duly allowed by the district court. Before leaving the city Mr. Farrar inspected the site for the home at Broadmoor.

"I am not as yet convinced, however, that active work could not have been inaugurated on the Myron Stratton home buildings as much as two years ago, without a material sacrifice being made."

"It would be unfair to make a definite statement until the examination is completed. I will then make a report to the governor and the legislature, giving my views and recommendations."

M'MILLAN ARRESTED ON COAST; BIGAMY CHARGED

K. E. McMillan, former postmaster at Amo, and who has frequently been in trouble in El Paso county, is under arrest at Covina, Cal., on a charge of bigamy. After assaulting his sister-in-law, Mrs. Walter Jackson of Wigwam, and threatening to kill Deputy Sheriff Charles M. Hobbs, the charges against him were dismissed and he was permitted to go to California under promise that he would never return to Colorado.

McMillan went to Covina, near Los Angeles, with a woman whom he introduced as his wife. It is said that his father, M. McMillan, a ranchman, near Covina, has been supporting for years a woman whom McMillan married in Colorado, together with two children. McMillan's father would have nothing to do with him, and it is alleged that the son created a disturbance when the elder refused to allow him to take the children away. The bringing of the case into court caused the two women to confront each other, and it is said enough evidence was obtained to warrant the charge of bigamy.

Ida D. Jackson, who accompanied McMillan to Covina, produced a marriage certificate showing that she married him in Spokane, March 7, 1911. Mrs. Minnie H. McMillan, the first wife, claimed that she had never been divorced from him. The records in the office of the district clerk of El Paso county show that she filed suit for divorce, and that the divorce was not granted but that she was given separate maintenance on July 18, 1908.

Big Surprise to Many in Colorado Springs

Local people are surprised at the QUICK results received from simple buckthorn bark, glycerine, etc., as mixed in Adler's-ka, the German appendicitis remedy. The Colorado Springs Drug Co. states this simple remedy antiseptizes the digestive system and draws off the impurities so thoroughly that a SINGLE DOSE relieves sour stomach, gas, on the stomach and constipation INSTANTLY.

WE HAVE SPENT years in developing the special Flavor of DERN'S Coffee, roasting and blending to just the right turn to achieve the alluring smack and tang that gives our coffee a savor all its own.

LOCAL MAN INVENTS SAFETY APPLIANCE

Claimed That Device Makes Elevator Accidents Impossible

A factory for the manufacture of an elevator safety appliance, invented by David R. James of Scranton, Pa., now a resident at the Modern Woodmen sanatorium, is to be built at Colorado Springs if the plans of several prominent local business men are carried out. A company will be incorporated by Mr. James and his associates this week to construct the device.

The safety appliance has been installed on the elevator of the A. J. hotel by James F. Reardon, president of the Central Electric company, who gave it a thorough test, and who is enthusiastic over its success. J. W. Atkinson, proprietor of the hotel, is also interested in the proposition. Arrangements are being made with the Hassell Iron Works for the manufacture of the device until the factory is completed and ready to operate.

The patent consists of a catch that will not allow the car to move if the doors are not shut. It is operated by electricity.

TRAVELERS TO SUNNY CLIMES

Though Panama is much in the public eye this winter because of the wonderful work "Colonel" Northalis is doing there, and thousands are going to see the "ditch," there is evidence that other winter playgrounds have not lost their attractiveness and popularity.

The Fifteenth Annual Cruise to the Orient and the Mediterranean, under Frank Clarke's auspices, leaves February 15 by the "Laconia," a new Cunarder. Nearly fifteen thousand miles will be covered by the tourists in making the trip, which does not involve a change of steamers.

Spain, Algiers, Athens, Constantinople, the Holy Land and Egypt, the Nile, Rome and the Riviera, will be visited in turn.

Mr. Clark reports that while Panama has been the lodestone to attract many who would otherwise have gone to Egypt and the Riviera, and the Balkan war has had its terrors for some, still the list of passengers will be a representative one numbering quite six hundred persons who come from thirty-four states and Canada.

We notice on the list from Denver Mr. and Mrs. Samuel S. Lundholm, from Monte Vista, and Mrs. Samuel H. Moore, Mrs. R. B. Wallace, Master Robt. B. Wallace.

Freshmen Tackle Sophs; Demand 'Hair for Hair'

The mosaic law of the college campus was applied vigorously and with interest, yesterday noon, when the men of the freshman class, in retaliation for the cutting of the hair of five of their number last Friday night by sophomores, waylaid the members of the sophomore class as they came from their recitations and asked for hair for 15 or more of them. The freshmen were dressed for battle, and the sophomores were on the point of charging when upper classmen, at the request of President Stetson, forced an armistice. The freshmen, armed with scissors, waited for the noon hour, and opened the campaign again with exercises in front of Palmer hall. As a result, there was a tendency to ex-pansion in the barber shop business downtown during the afternoon.

The trouble began last Friday evening, when the freshmen attempted to break up a sophomore stag banquet at the Alta Vista hotel, and five of them cut the hair of five of the sophomores. Yesterday was the first chance the classes had of getting together since that time. No one was seriously injured in either fight.

Lincoln Highway Ass'n. Meets Here Tomorrow

The second annual meeting of the Lincoln Highway association, which will be held tomorrow at the Chamber of Commerce rooms, with about 100 out-of-town members present, is going to be a "strictly business" gathering, if the efforts of the directors are successful. They are anxious that the association get busy, and have the road constructed, and not just talk over how it can be done. At present, the Lincoln highway from Colorado Springs to Grand Junction is probably the best cross-mountain route, but it needs repairing and better grades to attract the hundreds of motorists the state is after during the next few years.

The gathering will open tomorrow morning with a meeting of the directors. They will discuss several matters that are to come up before the regular session. At the first regular meeting the annual report of President Curtis will be read and committees appointed. No program has yet been arranged, but Chairman C. E. Allen of the state highway commission will be present to give several talks. Governor Ammons was unable to accept the invitation of the association to make an address.

The Golden Belt Road association of Kansas probably will send several representatives to tomorrow's meeting. This road connects with the Lincoln highway at the Kansas line, and the boosters from the Sunflower state are showing active interest in Colorado's part in the extension of the highway.

DR. SLOCUM TAKES TO HIGH SCHOOL STUDENTS

The pupils at the high school yesterday morning were addressed by President Slocum of Colorado college and Dr. Fitch of the Andover Theological seminary. Both spoke on the opportunities presented in the state of Colorado. The address to the students next Monday morning is to be delivered by the Rev. Frank Hale Tourer, rector of the Grace Episcopal church.

C. D. HURREY TELLS OF STUDENT Y. M. C. A. WORK

More than 150 Colorado college men at 6 o'clock last night sat down at a banquet at the Acaevia hotel, given in honor of Charles D. Hurrey, student secretary of the Young Men's Christian association, who will begin today a series of meetings at the college. There was plenty of good cheer and music, both instrumental and vocal, but few toasts, the latter feature being cut short in order that the students might attend Professor Palmer's lecture on George Herbert.

Mr. Hurrey delivered the only speech, an outline of the work that the Y. M. C. A. seeks to accomplish among the students. The greatest peril faced by the majority of the 208,000 men in American colleges, he said, is the neglect of Christian duties. It is the place of the Y. M. C. A. to bring these duties to mind.

Among the chief aims of the college Y. M. C. A., as he pointed them out, is to furnish social facilities to the young men who are denied fraternity affiliations. "Too often fraternities minister to those who least need their ministry," he declared, "and overlook those men of fine qualities who for one reason and another are not taken into the fraternities."

The Y. M. C. A. seeks to minister to lonely and unpopular men in the colleges; to strengthen the faith of those who are wavering; to awaken in the men a new sense of their responsibility to the community; to point out in its true colors the social evil, to encourage Bible study and mission study.

The grosser sins of college men, Mr. Hurrey thinks, are being wiped out, including intoxication and sexual sin, but there is a more insidious sin that is very prevalent, disloyalty to the simple, fundamental teachings of the home, such as prayer, Bible study, love for the church. It will be Mr. Hurrey's mission while here to reawaken this dormant loyalty. He will speak at chapel this morning, and later in the day will meet the foresters and freshmen, and be a guest at a reception in his honor at 5 o'clock at the residence of President and Mrs. Stetson.

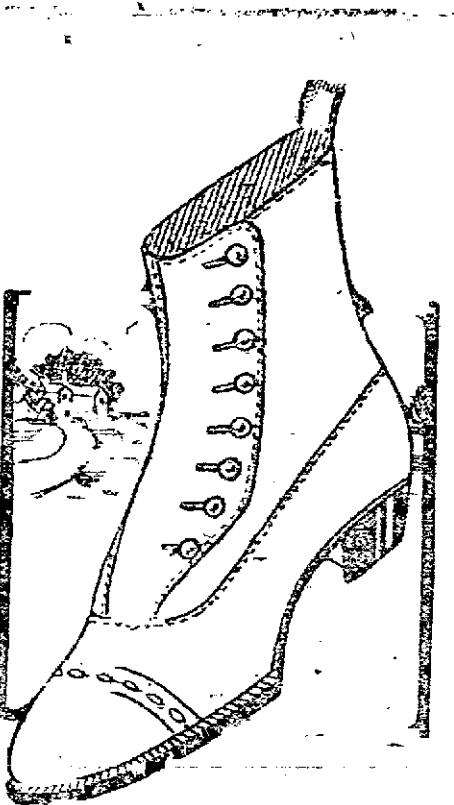

FIRST MEETING OF BIBLE INSTITUTE HELD TONIGHT

The "United Institute of Leaders and Possible Leaders of Men's and Boys' Bible Classes," which is to be in session here today, tomorrow and Thursday, will be opened at 6:15 including intoxication and sexual sin, but there is a more insidious sin that is very prevalent, disloyalty to the simple, fundamental teachings of the home, such as prayer, Bible study, love for the church. It will be Mr. Hurrey's mission while here to reawaken this dormant loyalty. He will speak at chapel this morning, and later in the day will meet the foresters and freshmen, and be a guest at a reception in his honor at 5 o'clock at the residence of President and Mrs. Stetson.

Opening supper rally of pastors, superintendents, leaders, teachers, etc., Clarence P. Dodge presiding. Address and discussion led by Mr. Goodman. Subject, "Winning Principles in Bible Study by Men."

8 p. m.—Stereopticon lecture, with 100 slides, "Men and the Bible on Sea and Land Around the World." To be held at the First Christian church, for men and women.

"GRAUSTARK"

One of the most potentious offerings of the theatrical season will be seen at the Grand opera house Thursday, February 13, matinee and night. "Graustark," the dramatization of George Barr McCutcheon's novel of

LOUISE VALENTE

As Princess Yelva in "Graustark," at the Grand Opera House, Thursday, February 13, Matinee and Night.

love and romance. This attraction comes to us after having scored a tremendous success in New York and other cities. The book was adapted to stage purposes by Grace Hayward, and has proved one of the best drawing attractions in the history of the stage. The novel has been widely read, and is one of those books that fascinate the reader and makes one anxious to witness the unfolding of its thrilling story on the stage. The United Play company has taken every

reuz, Prince Belorax, Ostom, Danndek, Siltzki, Countess Dagmar, Therese, Uncle Caspar and Aunt Yvonne.

The first scene of the play represents the exterior of the Hotel Regengatz, at Edelweiss, the capital city of the principality of "Graustark." The second and fourth acts occur in the boudoir of the Princess Yelva, while the third and fifth acts take place in the throne room of the castle. The locale of the play affords unusual opportunities for the display of rich and gorgeous costumes and elaborate scenic

mountings, which has been taken advantage of in every possible manner.

"DEEP PURPLE"

This production, one of the greatest of the many plays written by Paul Armstrong, the greatest American dramatist, will come to the Grand Opera house Wednesday, February 12, matinee and night.

A complete expose of the notorious badger game—the greatest of all blackmailing schemes ever devised—is the purpose of "The Deep Purple." To say that it has well filled its purpose would be giving this one of the strongest dramas ever written—too little mention. It startled society when it first appeared, and it has startled society ever since.

"The Deep Purple" has shown society what it has to contend with in the men and women of the underworld. It has shown to what extremes these creatures will go for their personal gain, has shown the depth of the pitfalls which are laid daily that the hangers-on in the great city may live at the expense of society at large. To say that the people are interested in putting it mildly. Few know the secret of the workings of the badger game, although the most have heard of it.

"Plot Forceful"

The plot is simple, but forceful. A young and innocent girl becomes infatuated with a crook, posing as a well-to-do New Yorker, who, seeing he can use her to good advantage, persuades her to leave her parents and go to the great metropolis with him, promising to marry her upon arriving at his home.

Once in New York he takes her to a rooming house, frequented only by members of the underworld. The plot is postponed owing to the many difficulties which arise, according to the explanation of the crook.

Meantime, the crook and his gang plan to work the badger game on a high young mining engineer who has just returned to his home in New York from the west. The girl is to be used as the "bait." The engineer is convinced that there is something crooked about the whole affair and goes prepared.

Once with the girl, he sees through the game, turns the tables on the crook and takes the girl to his mother's home, planning to send her back to her parents the next morning. Meantime, she has fallen in love with him and the curtain drops with the girl's sudden breakdown when she tells him of her love, which he has not suspected.

Details Looked After

Every detail in the plot is carefully worked out, not one thing missing. The characters are every one different; yet all are more true to life than those in any other great social play. Mr. Armstrong knew of what he wrote and he depicted only true conditions, building just enough plot to carry the production.

BELASCO'S CARE FOR DETAIL

How the Well-Known Producer Stages the Plays He Presents.

Playgoers will have an opportunity to witness the artistry of David Belasco as a producer, when "The Concert" is presented here at the Grand Opera house, Monday, February 17. The result ought to be as interesting to the theatergoing public as it has proved to be instructive to other theatrical directors.

It is known that Mr. Belasco spent nearly a year in getting this comedy ready for the stage. In the beginning he had to have it entirely rewritten—it was first produced in Germany—and practically a new play made of it. Once he had the completed manuscript he set to work to stage it as it should be done.

The first act in the comedy passes in a great musician's home on Riverside drive, New York. It is a drawing room scene, and the apartment looks

Crowning the brow of the Lizz figure is a golden wreath, a tribute from his pupil.

It is the second act picture, however, that must have given Mr. Belasco the greatest pleasure in fitting for the stage. The last two acts of the comedy take place in a bungalow on the Catskill mountains. There the musician repairs for rest when tired from

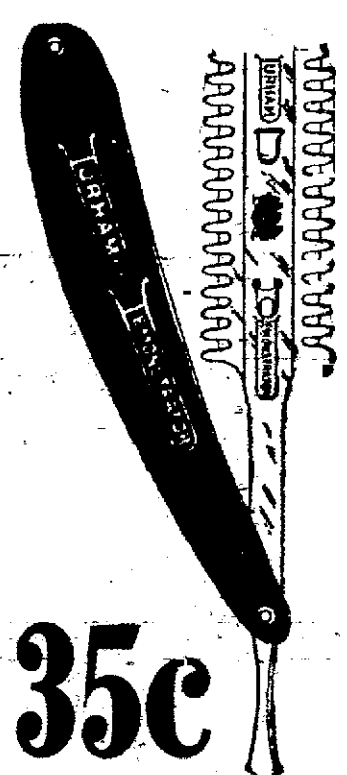

ISABEL IRVING

In David Belasco's Production of "The Concert," at the Grand Opera House, Monday, February 17.

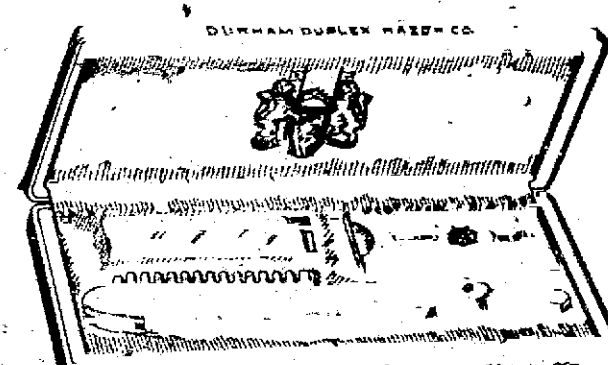

as human beings really lived in it, which is more than can be said of most stage settings depicting the same kind of room. This Belasco room is a "comfy" sort of a place, with an air of refinement and luxury, but not of the glaring sort. Being a musician's home, it is furnished with the very things you would expect to find there. There are pictures of great musicians. In a conspicuous corner is a marble bust of Lizz. The chief character in the play, by the way, is supposed to have been Lizz's greatest pupil.

his labors in the city. This setting shows a large living room. The furniture is antique, and not "made in Grand Rapids," either. The heirloom rush-bottomed chairs are of solid workmanship, and show their history. The big, open fireplace has the old-fashioned andirons and equipment of other days. There is a grand piano for the owner of the bungalow, and his books and souvenirs of his career are scattered about. It is just the kind of bungalow that everyone

That Wonderful Evening

THERE is a time above all times when a woman should be in perfect physical condition. It is the time previous to the coming of her babe. During this period many women suffer from headache, sleeplessness, pains of various description, poor appetite, and a host of other ailments which should be eliminated in justice to the new life about to be ushered into this world.

DR. PIERCE'S FAVORITE PRESCRIPTION

It is a scientific medicine carefully compounded by an experienced and skillful physician, and adapted to the needs and requirements of woman's delicate system. It has been recommended for over forty years as a remedy for those peculiar ailments which make their appearance during "the expectant" period. Motherhood is made easier by its use. Thousands of women have been benefited by this great medicine.

Your druggist can supply you in liquid or tablet form, or you can send 50-cent stamps for a trial box of Dr. Pierce's Favorite Prescription Tablets to Dr. Pierce, at Invalids' Home and Surgical Institute, Buffalo.

It is your privilege to write to Dr. Pierce for advice, and it will be gladly given free of charge. Of course all communications are confidential.

Hot Springs Arkansas

Records of the "Big Three."

Years	W.	L.	Pct.
Clarke	124	1291	.022
McGraw	19	958	.019
Chance	7	711	.009

NEW YORK, Feb. 10.—The most certain obstacle in the path of John J. McGraw to a third consecutive pennant appears to be Fred Clarke and his Cubs. The giant manager and the sporting world at large, with the possible exception of some few fanatic fans, players, grandstand hangers-on and managers who liberate the Windy city, have expressed deep opinion repeatedly, in the words of McGraw, "Clarke is the man I fear. The Cubs will be winners, but Pittsburgh is the club he has to beat."

McGraw Wants Three Straight.

McGraw has his heart set upon winning the 1913 pennant, for then he will have achieved a "Triple" uninterrupted successes, the equal of his two great competitors, both Clarke and Frank Chance have gained three straight.

Clarke Consistent.

Let us investigate then, the worthy champion of McGraw, Fred Clarke, the Kansas ranchman. He has completed his thirteenth year at the helm of the Pirates craft and in the past campaign showed far more consistent form than even the Polo grounds champions. In 13 years Clarke amassed four pennants, four second places and a tie for another, three "thirds," and one fourth. Clarke took charge of Pittsburgh in 1902 and finished second. The next year he tore loose and tipped the organization all to pieces, relishing three straight winners. McGraw's star then began the ascent, and the great general of "Smoke" Town was forced into a back seat for a spell. In the time years since Pittsburgh and Boston battled for the first world's pennant under the prevailing organized baseball government, Fred Clarke has won only one pennant. That fell to him in 1909, when he showed his most successful season by winning 110 victories. That year also he beat Detroit after a very hard fight of seven engagements for the world's championship. But in all that time Fred Clarke was never disgraced. Only once did he finish as poorly as last among the first four clubs.

When it appeared as if Fred Clarke had designs upon organizing a pennant "trust" among Hans Wagner and his other pals there arose a mighty McGraw to check the presumption. And when McGraw began to aspire, along similar lines, Frank Chance sprang into prominence. Thus came into being the "Great Three," which proved an ideal combination for the parent major body. Each of the three checkedmate the others so that the balance of power kept wobbling about. Honors passed back and forth constantly, as it were, with no one city "bagging" the laurels, and all three New York, Chicago and Pittsburgh very much in the limelight at all times.

Pirate Leader Greatest.

Of the three great National league managers, Clarke, on account of his length of service must be awarded the palm. Though both McGraw and Chance have shown better averages in shorter experience, in 13 years Clarke has won 1,291 and lost 1,292 games for a grand average of .021. No other manager has won a thousand games. McGraw is closest with 355 victories for 19 years. Opposed to the winners are 559 defeats which produce a record of .622. In seven years Chance has won 714 and lost but 356, developing the wonderful average speed of .661. In other words, he won two out of every three games played.

It is one way it is very much to be regretted that Frank Chance was forced to discontinue his labors with the Cubs. It would have been interesting indeed to see him shoot away at Clarke's record for 13 years. Change may be greater things in New York than he did in Chicago, but the way of direct comparison to the abilities of his two erstwhile respected contemporaries will have been lost. It seems to say, however, that it is very doubtful if any league will ever boast again of three such wonderful managers as Fred Clarke, John McGraw and Frank Chance. They have won more games than any trio of any time. In an aggregate of 30 seasons the "Big Three" bagged 2,871 victories out of 1,813 played, showing a total percentage of approximately .640. They have registered considerably over three victories out of every five starts. It will be interesting to note the duel between McGraw and Clarke now that the common rival, Frank Chance, has looked upon new fields of conquest.

The German government is said to contemplate monopolizing the tobacco trade shortly.

WILL TRY FOR STEADY JOB WITH WASHINGTON

Frank Laporte, the hard-hitting infielder, whom Manager Clark Griffith last season secured from the St. Louis Browns to bolster up the Washington infield, now a veteran, is confident that he will retain a firm hold on the second base position against the ambitious attempts of recruit infielders to wrest it away from him during the spring training workouts.

TY GETS THAT \$15,000

Tyrus Raymond Cobb, greatest individual star of the American league, whose demands for a yearly salary of \$15,000 for his services as centerfielder and swiftness extraordinary of the Detroit Tigers, have at last been acceded to by owner Frank Navin. But there is a strong belief that Navin will cause other players to suffer proportionately because of the financial gain of the Georgia Peach.

FEAR SPLIT IN U. S. LAWN TENNIS ASS'N

NEW YORK, Feb. 10.—A split in the United States Lawn Tennis association is imminent when their body convenes here for its annual meeting Friday.

The dissension arose over a number of proposed amendments to the constitution of the association which were prepared by Henry W. Stinson, Ward C. Burton, Raymond D. Little, Lyle E. Mahan and Palmer E. Presbury, and were circulated among the members by mail.

Opposition is most evident against the proposed new definition of an amateur, which is so drastic that it declares as a professional any player having any connection with a sporting goods house, and prohibits amateurs from accepting from any hotel or club gratuitous courtesies in the way of transportation and expenses.

TWO LOCAL ENTRIES IN DENVER ATHLETIC MEET

Frank Mirza, a Colorado Springs heavyweight wrestler, left yesterday morning for Denver, where he will appear for a wrestling tournament, coming Leonard of Colorado City, a bantamweight prize fighter, left Sunday to take part in the house and both amateurs expect to make a good showing in their various events.

YOKEL WINS MIDDLEWEIGHT WRESTLING CHAMPIONSHIP

DULUTH, Minn., Feb. 10.—Mike Yokel of Salt Lake City won tonight the middleweight championship wrestling title from Walter Miller of St. Paul. Yokel took the first fall in one hour and 10 minutes and the second in 18 minutes.

HERRMANN HAS CONFIDENCE IN TINKER

Garry Herrmann, the genial owner of the Cincinnati Reds and chairman of the national baseball commission, who presided at the meeting of that body and attended the meeting of the managers of the National league in New York this week, during the course of a lanning he Herrmann smilingly asserted that Cincinnati was the team that all pennant contenders would have to figure on hereafter. He said that he believed he had in Tinker the right man to tackle the job of piloting the Reds to a place higher than fourth in the National league race.

GOOD BOUTS SCHEDULED FOR WASHINGTON'S BIRTHDAY

By W. W. NAUGHTON.

SAN FRANCISCO, Feb. 10.—More than ordinary interest attaches to the forthcoming contests that are to take place on Washington's birthday. While the events in themselves are important enough to attract attention, what is underlying them is the fight that is the possibility that these may be the last professional boxing matches the sports of California will have the privilege of witnessing for at least a couple of years.

It all depends of course on what happens at Sacramento when the legislature reconvenes, early in March, and passes upon the measure which has for its object the suppression of the sport of elate.

Fighter on Anxious Seat

It is very evident at this stage of the game that those who derive a sustenance from the pugilistic industry are on the anxious seat. It isn't like the old days up in the city, where the lawmakers foregather every once in a while. The man who used to put "the sack in Sacramento" doesn't show his nose there now, and already Senator Brown, the framer of the prohibitive law, is being referred to as "Knock-out Brown No. 2."

Incidentally it is to wonder where the championship bouts of the future will take place if a bill is called in the Golden state. For now San Francisco and Los Angeles have enjoyed the distinction of being the scene of a majority of the ring events in which titles were involved.

Of course, on a pinch, a championship bout could be arranged for some point in Nevada, but it had to be a super-attraction to draw the supporters of boxing from the big centers of population to the sagebrush country.

With Los Angeles and San Francisco off the map, where would Willie Ritchie defend his title when he felt like resuming ring activity? Where would Luther McCarty throw down the gauntlet and say: "I have had my fight."

TRY TO BREAK SKI RECORD AT BIG MEET

IRONWOOD, Mich., Feb. 10.—An attempt to break the world's record ski jump will be made here Friday, weather permitting, by the entrants in the ninth annual national championship ski tournament to be held under the auspices of the Ironwood Ski club.

Members of the club have lengthened the take-off scaffold, and were confident today that the world's record jump, made by Anderson in Norway last year, would be beaten. Anderson's jump was 156 feet. The addition to the Ironwood take-off makes 185 feet possible. The club already holds America's greatest hill record 151 feet. The tournament will last three days, prizes to the amount of \$1,000 having been provided for the winners of the various events.

While a high opinion of Mandot is maintained in San Francisco it must be said that the local sportsmen are not as enthusiastic over his chances as they are in New Orleans.

TONIGHT'S GAME POSTPONED

The indoor baseball game between the Robbins and Powell-Doner teams which was scheduled for this evening at the Y. M. C. A. has been postponed on account of the recent death of B. G. Robbins. No dates have been set for these postponed games.

BOWLING NEWS

The Brunswick Three-Men league started last night. The opening games between the Cubs and Highlanders resulted in the Highlanders winning two out of three. Gamble of the Highlanders had high score, 224, and Standley of the same team had high average, 192. Gamble had high score for the Cubs, 214, and also high average, 181.

The lineup.

	CUBS		HIGHLANDERS
Ludwig	167	182	141
Grassie	167	193	214
Merrison	179	208	169
Totals	413	583	524
Gamble	234	145	194
Allen	154	164	169
Standley	233	171	174
Totals	621	480	547

ITHACA, Feb. 10.—Because the new Cornell football field will not be ready next fall and because the members of the Cornell football team expressed a desire to play next year's Penn game on Franklin field Cornell will journey down to Philadelphia again for the annual Thanksgiving day football game. It was learned today when the football schedule was made public. Under a home and home agreement made two years ago Penn was due to play here next fall, but Cornell waived this.

Michigan is to be the big home opponent. The Carlisle Indians and Lafayette will play in Ithaca the first time in a decade that Cornell has met either on the gridiron. Dartmouth and Williams, on last year's schedule, could not be played this year. Utrinus and Pittsburg are other new games.

The schedule follows:

September 24, Utrinus at Ithaca; 27, Colgate at Ithaca.

October 4, Oberlin at Ithaca; 11, Carlisle at Ithaca; 18, Rockwell at Ithaca; 25, University of Pittsburgh at Ithaca.

November 1, Harvard at Cambridge; 5, Michigan at Ithaca; 12, Lafayette at Ithaca; 27, Pennsylvania at Philadelphia.

SULLIVAN'S ACTION PRAISED

James E. Sullivan, secretary of the American Athletic union, whose prompt action in conjunction with Gustavus T. Kirby and Bartow Weeks, in extending an apology to the Swedish Olympic committee for ordering Jim Thorpe in the contests at Stockholm, has met with the unqualified approval of all sport lovers.

1913 Season Opens on April 10; Schedule Out

NEW YORK, Feb. 10.—The American league formally adopted without change, at its meeting, the schedule of games for 1913, already agreed upon. The National league will meet tomorrow and probably take similar action. The national commission also will meet tomorrow, probably before the league meeting.

The American league was one of three baseball organizations which met here today, the other being the International league and the Eastern association, until recently known as the Connecticut league.

Beyond the ratification of the schedule little was done by the American league. President Johnson was authorized to investigate the case of Fred Perrine, a veteran umpire, who is reported ill and about to lose his sight, and to give him whatever financial aid Mr. Johnson deems necessary. Perrine now is at Berkeley, Cal. Another resolution was adopted making it compulsory for visiting teams to use the dressing rooms at the various parks instead of going to the ball grounds in their uniforms.

The American league season will open April 10 with the world's champion Boston team crossing bats at home with Philadelphia. Washington, the runner-up to the Pennant winner of last year, begins the season at the national capital with the New York team. Cleveland, at home the opening day, will have Chicago as an opponent, and St. Louis will meet Detroit on the former's grounds. The schedule calls for 154 games.

Several trades and players were spoken of today, but only two were positively made. Henry Gormy, first baseman and change catcher, goes to Buffalo from the Boston Nationals, and Beals Becker, outfielder of the New York Nationals, has been secured by Cincinnati for the waiver price. It was currently reported that "Cy" Seymour, who recently bought his release from Los Angeles, will join the Boston Nationals.

Chance Reaches New York.

Frank Chance, the new manager of the local American league club, reached here from the Pacific coast a few minutes after the league meeting ended and was accorded a hearty greeting.

One of the first to shake his hand was Manager McGraw of the New York Nationals, who said:

"I congratulate you on getting into a good row."

Jake Stahl and Clarke Griffith followed suit. As soon as Chance could catch his breath, he said:

"I am glad to come to New York and doubly glad that I am with the American league. I like Boston for a training place and there will be no trading of players until the team gets back from there. I intend playing first base myself, and hope to be in the opening game. I feel in fine shape and my head does not bother me any more. I am positive I can manage the team better as a player than from the bench. Chase will play second, and I feel confident that his speed will overcome the handicap of his being left handed."

"Smoker" Joe Wood, the premier twirler of the Boston American league team, signed tonight a contract for the coming season, which provides for an advance of salary over that paid him last year.

PUGILISTS ARRESTED FOR LARCENY IN PRISON

LINCOLN, Neb., Feb. 10.—Clarence English and Guy Buckles, the former well known as a pugilist, were today bound over to the district court by Police Judge Fullerton on the charge of larceny from the person. The complaint was made by Clarence Johnson, a train news agent, who claims the two robbed him. In the absence of bail, English and Buckles were committed to jail.

Paper from which gas mantles can be made, instead of using the more expensive fabrics, has been invented by an Italian scientist.

FLETCHER GOOD INFIELDER

Charley Fletcher, the speedy shortstop of the New York Giants, despite his poor showing in the world's series, is one of the best fielding short gardeners in the game. Nobody not even himself, seems able to solve the puzzle of how he possibly made the costly fumbles in those eventful games against the Red Sox.

THORPE STORY IS A DAINTY MORSEL FOR BRITISH SPORTS

Since the announcement was made at Jim Thorpe, the wonderful Indian athlete, is no longer entitled to a "pure" rating. American sportsmen have been rather curious to learn how the British newspapers would view the case. But the cloud of suspicion has been lifted. The majority of English journals have sounded a roar of protest that in volume was only exceeded by the groans which were raised when Haisveller, the popular Irish quarter-miler, was nearly named by the American sprinters in the London Olympic games. The attitude of the Swedish sportsmen offers pleasing contrast. They believe that Thorpe is entitled to keep the prizes won at Stockholm, as the rules of a game clearly prescribe that protests must be made within 30 days of the tribulation of the prizes.

SULLIVAN'S ACTION PRAISED

James E. Sullivan, secretary of the American Athletic union, whose prompt action in conjunction with Gustavus T. Kirby and Bartow Weeks, in extending an apology to the Swedish Olympic committee for ordering Jim Thorpe in the contests at Stockholm, has met with the unqualified approval of all sport lovers.

Deaths and Funerals

The funeral of Robert Finley was held yesterday from the Methodist church in Colorado City, the Rev. G. H. Stuntz officiating. The members of W. J. Palmer post, G. A. R., had charge of the services at the church. The services at Evergreen cemetery were in charge of Elphus Lodge No. 13, A. P. and A. M., of which Finley had been a member for the last 44 years. At these services, David Spielman, one of the oldest pioneers, acted as senior deacon, a position he held in the lodge when Finley was made a Mason.

The funeral of Mrs. Carrie E. Randolph, aged 35, who died Sunday morning at her home, 325 East Union street, will be held at 3 o'clock this afternoon from the undertaking rooms of Hallett & Baker. Interment will be in Evergreen cemetery. Mrs. Randolph was the wife of Clyde Randolph of the G. W. Blake Auto company.

CONTRACT IS AWARDED FOR \$16,700 BUILDING

E. H. Heath has awarded a contract to C. H. Blood of the erection of a house and garage at Manitou to cost \$16,700. The work is to be completed by June 15.

Ever Go East by Water?

If you haven't, you have missed something. Next time follow this plan: Take any rail line from Denver to New Orleans—stop over there a week or 10 days, visit the old French theatre and the picturesque old French market—then take one of the 10,000-ton

Southern Pacific Steamships

to New York and enjoy a 2,000-mile ocean voyage. These ships are magnificently equipped and afford every comfort. Your transportation all the way, including berth and meals on ship, will cost you only

\$60

You don't have to worry about the details, either—just get in touch with

WM. K. McALLISTER, G. A.
313 Railway Exchange Building, Denver, Colo.
